# Multi - Language

❖ **Points that will be covered in this document:**

- ➢ **Multi – language setup types**

- ➢ **Explanation of partial language setup**

- ➢ **Explanation of activation key type**

- ➢ **Complete Multi – language setup for new company**

- Multi language setup can be used in two ways:
  - Partial Multi-language
  - Full Multi-language
- Multi language setup feature can be helpful to the businesses like Agriculture, or businesses who wish to print out certain documents in their native language.
- Miracle software allows two language selection other than English:

  1. Gujarati 2. Hindi

- Let us get information about Partial multi language first.

Explanation of
Partial Multi – Language Setup

- Partial multi-language feature allow users to print vouchers and balance sheet in their native language.

- Now, for those users multi language facility can be setup from Software & Company setup without any major changes.

- Other than English, users have option to create Gujarati or Hindi language.

- Let us see how partial multi language setup works.

Enable by selecting Software setup option.

Setup -> Software Setup -> Software Setup

Set "Yes" in Multi Language Support option.

Explanation of Activation Key in 9th slide

Explanation of Activation Key Type

- After enabling Multi-language support, if a user desires to activate it for a certain option, he/she can simply do it by following method:

- User can activate the Multi-language support by Pressing either:

  Caps Lock or Scroll Lock

- None option will disable the Activation Key option.

Select your preferred Activation Key.

Explanation of Keyboard layout types in 12th slide

Explanation of Keyboard Layout Types

- Majority of the users prefers Phonetic Keyword Layout since, it related to normal keyboard keys and easier to type in different language.

- Basically there are four types of Keyboard Layout to choose from:

  ➢ Phonetic

  ➢ Inscript

  ➢ Type writer

  ➢ New phonetic
